DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 25th, 2005 has been entered.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because figs. 4-7 are blurry and it is difficult to discern what is actually shown. These figures are not of high enough quality to make suitable reproductions. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 15-17,19-21,23-26,28-31,34,36-43,45-47,49-53 and 58-65 are allowed.

4. Each of these claims recites a cell comprising a magnetic particle that is coated with a peptide at a ratio of 3ng to 6.6ug of peptide to 1mg of magnetic particle. Applicant's disclosure further teaches that such a ratio of peptide coating to particle is critical to the claimed invention. P. 14, lines 6-13 of applicant's specification states the possible ratios of peptide to magnetic particle and also discloses that "if too much peptide is coated on the magnetic bead, the final

magnetic cells end up adhering to each other, impeding movement to the disease site which is the target. If too little is coated, the properties of the magnetic cell itself cannot be achieved". The prior art of record fails to disclose the critical ratio claimed by applicant
